Dear Commissioners,

There are many events in life that bring people together in organized support: funerals, births, illnesses and recovery, weddings, and graduations. In Higgins, Texas we are all very close so when these events occur we use them as opportunities to come together and assist each other. We bring food and organize a rotating schedule. We make sure the house is clean and children and family members have rides to and from work and school. We celebrate and support. We aren't a formal organization, non-profit, or anything of the sort. We're just a bunch of citizens who appreciate each other and recognize that there are often times when a single person can't handle life's challenges alone.

We again would like to come together, this time in a more formal manner, by writing this letter to express our excitement about and support of the merger between AT&T and T-Mobile. I'm sure that many organizations, companies, and political officials have written to you. While these letters and the information they have given are very important, I hope you view this letter as the voice of the American citizen. We are the individuals who would directly benefit from this merger in our day to day lives. We may not have a company label or title but we are still important and our opinion matters. Remember, companies and organizations are simply a group of individuals gathered together under the banner of their logo.

We are very excited about the merger. We live in a more rural part of Texas that does not have high-speed wireless internet and cell service that we desire and need. Trying to stay connected while on-the-go is made somewhat more difficult by wireless service that is not widely available throughout our rural areas. We are ready and excited for this difficulty to become an issue of the past with the help and promise of AT&T's 4G LTE high-speed wireless broadband.

Please approve this merger. It would benefit not just us, but all citizens around the country.

Sincerely,

Citizens of Higgins, Texas
